

# The Wovo Line: CIPP's Next-Gen Lateral Liner Solutions

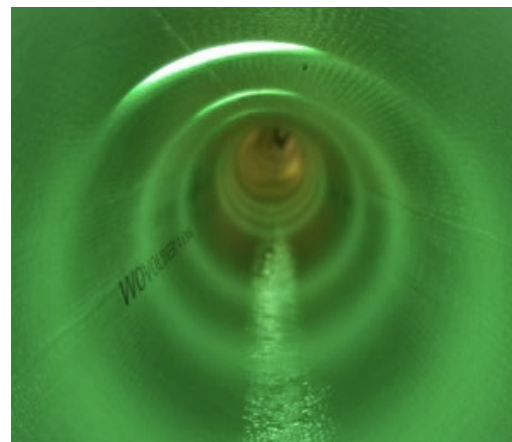

From The Global Leader You Can Trust

## Max WovoLiner®

**WOVOLINER'S UNIQUE  
CONSTRUCTION AND  
SEAMLESS LOOP STITCHING  
ALLOWS INSTALLATION  
AROUND VIRTUALLY  
ANY TURN AND PIPE  
CONFIGURATION.**

Max WovoLiner® is a flexible liner uniquely bonded to a seamless impermeable PU coating that is ideal for vertical in-building and buried lateral pipelines. designed and third-party tested coatings.

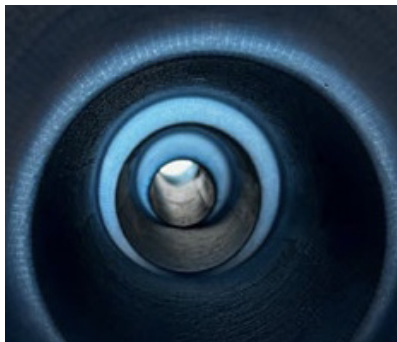

- Multiple bends up to 90°
- Compatible with most epoxy and LED/UV resin types
- Easily Impregnated
- Low pressure needed to invert

## Max WovoX®

**WOVOX GIVES MORE CONTROL. NOT TOO SHORT, NOT TOO LONG. EXTENSION OF UP TO 50% IS POSSIBLE WITH ONE LINER, 90° TURNS, NO WRINKLES, NO FOLDS, WITHOUT SACRIFICING FINISHED THICKNESS.**

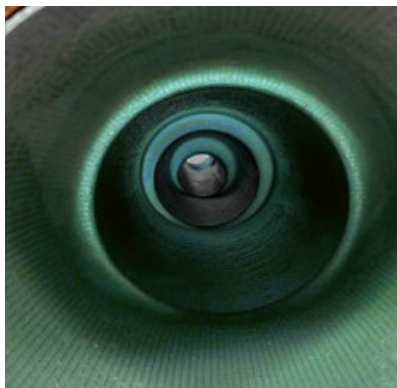

The Wovo System helps installers looking to add in-building lining to their repertoire with a product capable of lining around multiple bends easily and with spectacular finished qualities. With the addition of WovoX to the WovoLiner System, difficult installations are transformed into reliable installations.

- Ability to transition liners to multiple diameter sizes
- Multiple bends up to 90°
- Increased consistency for calculating stretch and drawback to reliably hit your landing mark!

## Max WovoGlass®

**3X STRONGER, ULTRAFLEXIBLE AND HITS THE MARK**

Seamless, circular-knitted construction, combines polyester yarns with extensible fiberglass reinforcement to deliver superior physical properties when you need it most. 3X stronger than most CIPP liners with the ability to negotiate multiple bends up to 90° and transition several pipe sizes including 4-6 inch!

- Transition several pipe diameters with one liner
- Deliver 3X the strength – greatly reducing typical ASTM-1216 design thicknesses
- Easily wets-out, inverts and transitions with very low pressure – no need for “step inflation” to exercise the liner
- Cure by ambient, heat or LED light
- Navigate 90° bends, no folds or wrinkles
- Use for point repairs and sectional liners (uncoated)
- Superior consistency to dramatically minimize stretch and drawback
- Ultra-flexible, extensible liner uniquely bonded to a seamless impermeable PU coating just like MaxLiner’s WovoLiner and WovoX products
