# TECHNICAL DATA SHEET

# United UV GRP

#### **FEATURES AND BENEFITS**

- Multi-layer, overlapping continuous glass fiber liner cure creates high strength, thinner wall
- Made in the USA, made on-demand and delivered in as little as 2 weeks, giving the contractor maximum in-hands shelf life minimum 6-month in climate-controlled environment
- Pre-impregnated, installation ready up to 2,000 ft. | 610m\*
- Once cured, smooth inner surface improves flow capacity and minimizes abrasion
- Easily bridge and accommodate offset joints and diameter changes
- Liner design has internally expanding overlaps
- United UV GRP is cured using ultra-violet light resulting in a faster cure and lower overall CO<sub>2</sub> emissions

#### TYPICAL APPLICATIONS

**United UV GRP Removable Inner Film** 

• Round: 6" - 72" | 150mm - 1,828mm

# United UV GRP For Gravity Sewers

#### **DESCRIPTION**

Explore United UV GRP liners, crafted from continuous fiberglass for exceptional strength and durability. Perfect for large-scale sewer UV liner projects, these pre-impregnated liners streamline the UV curing process, enhance quality control, and reduce environmental impact. Ideal for tough, long length, large-diameter applications.

#### Anatomy of a United UV GRP CIPP Liner

#### **UNITED UV GRP**

Features multiple layers of material, which are overlapped to provide maximum strength. This multi-layer construction consists of:

- 1. Clear Inner Film
- 2. Fiberglass / Veil
- 3. Multiple fiberglass layers to meet desired thickness
- 4. Outer Film, UV Protective Layer
